Three Types of 6-4 Chords by Scott Watson on Mar 20, 2014
Most theory texts identify three reasons to use a chord in second inversion: cadential, pedal, and passing.

*Three Types of 6-4 Chords | Educreations*

The chord can resolve to a 6 4 chord, functionally either as a cadential 6 4 intensification of V, or as the second inversion of I.The cadential 6 4, in turn, resolves to a root-position V. This progression ensures that, in its voice leading, each pair of voices moves either by oblique motion or contrary motion and avoids parallel motion altogether. In minor modes, both *6* and *5*. do not move ...

The typical thoroughbass figure is 6/4–5/3, leading to the common name for this progression, the cadential six-four. The complete figure is 8/6/4–8/5/3. The cadential six-four can occur over the cadential dominant of a PAC, IAC, or HC. The last type of compound cadence is a special case of the cadential six-four, where the fourth voice introduces a seventh over the second dominant chord, rather than simply doubling the bass for both chords. This compound cadence type requires four voices ...

3.6.4 Mutable Sequence Types
List objects support additional operations that allow in-place modification of the object. Other mutable sequence types (when added to the language) should also support these operations. Strings and tuples are immutable sequence types: such objects cannot be modified once created.

Often, a student will assume that a bar in 6/8 ought to be rewritten in 3/4, because they contain the same number of quavers (eighth notes) per bar. This is a mistake! 6/8 is duple time, and 3/4 is triple time, so it is impossible to rewrite a rhythm in that way without changing the rhythmic effect.

Regular tilings. Following Grünbaum and Shephard (section 1.3), a tiling is said to be regular if the symmetry group of the tiling acts transitively on the flags of the tiling, where a flag is a triple consisting of a mutually incident vertex, edge and tile of the tiling.This means that, for every pair of flags, there is a symmetry operation mapping the first flag to the second.

We can divide our total pay system into three categories: pay, incentives, and other types of compensation. Pay is the hourly, weekly, or monthly salary an employee earns. An incentive, often called a pay-for-performance incentive, is given for meeting certain performance standards, such as meeting sales targets.
