7th Grade Science Ecology Unit Information Milestones Domain/Weight: Interdependence of Life 50 % Purpose/Goal(s): Within the Interdependence of Life domain, students are expected to describe Earth’s major biomes and understand environmental influences that affect both individuals and populations. Complex interactions among producers and

7th Grade Science Ecology Unit Information
Grade: 7 Stage 1: Desired Results : Established Goals (Standards) TEKS or Scope & Sequence : 7.5. Matter and energy. The student knows that interactions occur between matter and energy. The student is expected to: (A) Recognize that radiant energy from the Sun is transformed into chemical energy through the process of photosynthesis.

Ecology – Energy Flow, Environments, and Habitats [7th grade]
Ecology is the study of how living things interact with each other and their environment. Earlier this year we learned about the levels of organization within an organism: cell-tissue-organ-organ system-organism. Now we are looking at the levels of organization starting at an individual (i.e., organism) and ending with the biosphere (i.e., earth).
