a shame that fiction and non-fiction aren't

Time has become an increasingly important topic in urban studies and urban planning. The spatial-temporal interplay is not only of relevance for the theory of urban development and urban politics, but also for urban planning and governance.

The space-time approach focuses on the human being with its various habits and routines in the city. Understanding and taking those habits into account in urban planning and public policies offers a new way to improve the quality of life in our cities. Adapting the supply and accessibility of public spaces and services to the inhabitants' space-time needs calls for an integrated approach to the physical design of urban space and to the organization of cities. In the last two decades the body of practical and theoretical work on urban space-time topics has grown substantially. The book offers a state of the art overview of the theoretical reasoning, the development of new analytical tools, and practical experience of the space-time design of public cities in major European countries. The contributions were written by academics and practitioners from various

Originally published in 1928, this detailed book examines the beginnings, progress and substance of the trade between India and the Roman Empire from Augustus to Marcus Aurelius. Warmington presents this history from a western point of view, and uses a wide range of ancient literary sources to explore what goods were traded between the two regions and the mechanisms of that trade. This thoroughly researched book will be of value to anyone with an interest in ancient trade and connections between the Roman Empire and its neighbours.

Southeast Asia has long been seen as a

unity, although other terms have been used to describe it: Further India, Little China, the Nanyang. The region has had a protracted maritime history.

Confucianism, Buddhism, Islam, Hinduism, Christianity are all represented. It has seen a quintet of colonial powers - Britain, France, the Netherlands, Spain, the United States. Most recently, it has become one of the fastest growing parts of the world economy. The very term 'Southeast Asia' is clearly more than a geographical expression. The Cambridge History of Southeast Asia is a multi-authored treatment of the whole of mainland and island Southeast Asia from Burma to Indonesia. Unlike other histories of the region, it is not divided on a country-by-country basis and is not structured purely chronologically, but rather takes a thematic and regional approach to Southeast Asia's history. This volume, the

first of two, covers the period from the region's pre-history up to the early nineteenth century of the Christian era, tracing the development of early politics, the integration of religion with social and cultural life, the great changes caused by the advent of the Europeans in the region and the increasing incorporation of Southeast Asian trade into international markets. Under the editorship of Nicholas Tarling, Professor of History at the University of Auckland in New Zealand, each chapter is well integrated into the whole. Professor Tarling has assembled a highly respected team of international scholars who have presented the latest historical research on the region and succeeded in producing a provocative and exciting account of the region's history.

Charting the progression from styles dictated by fashion and tradition towards more unique and individualised looks, this book explores how the history of women's hair in the west corresponds with their liberation over the course of the 1900s. Refined illustrations, era-specific photographs, and contemporary images tell the story of the hairstyles and fashion trends that flourished between 1940 and 1980, as well as those in vogue today. The volume closes with a section dedicated to the most famous hairstylists and salons de coiffeur, past and present.
