Activity 1. Mean, median and mode. Complete the activity sheet from White Rose Maths on mean, median and mode to test your knowledge. You can print it out or write your answers on a piece of paper.

#### ~~Mean, median and mode — Homeschool lessons in Secondary ...~~

9-1, Mean, Median, and Mode (CCSS Mathematical Practices) A measure of central tendency is a single value that summarizes how a set of data is centered Mean, median, and mode are measures of central tendency .

#### ~~9-1, Mean, Median, and Mode — Mrs. Scott's 8th Grade STEM Math~~

9. (a) The median of a set of eight numbers is 41. Given that seven of the numbers are 9, 2, 3, 4, 12, 13 and 1, find the eighth number. (b) The mean of a set of six numbers is 2 and the mean of another set of ten numbers is m. If the mean of the combined set of sixteen numbers is 7, find the value of m.

#### ~~9.1 Mean, Median, Mode and Range~~

Mean. Median. Mode. Even if you think you know them quite well, we assure you that 90% of professionals don't use them correctly. Mean, Median and Mode: When to use each one of them. Image courtesy of Wikipedia. People love to calculate means.

#### ~~Mean, Median and Mode — When to use each one of them.~~

Work out the mean, median, and mode of their scores. [3 marks] Mean: There are 9 data points. First add the numbers together and then divide the result by 9.  $56 + 79 + 77 + 48 + 90 + 68 + 79 + 92 + 71 = 660$   $\text{Mean} = \frac{660}{9} = 73.3$  (1 dp) Median: Firstly, put the numbers in ascending order. 48, 56, 68, 71, 77, 79, 79, 90, 92

#### ~~Mean Median Mode and Range Worksheets | Questions and Revision~~

13, 13, 13, 13, 14, 14, 16, 18, 21. There are nine numbers in the list, so the middle one will be the  $(9 + 1) \div 2 = 10 \div 2 = 5$  th number: 13, 13, 13, 13, 14, 14, 16, 18, 21. 13, 13, 13, 13, 14, 14, 16, 18, 21. So the median is 14. The mode is the number that is repeated more often than any other, so 13 is the mode.

#### ~~Mean, Median, Mode, and Range | Purplemath~~

Median Example. For the data set 1, 1, 2, 5, 6, 6, 9 the median is 5. For the data set 1, 1, 2, 6, 6, 9 the median is 4. Take the mean of 2 and 6 or,  $(2+6)/2 = 4$ . Median Formula. Ordering a data set  $x_1 \leq x_2 \leq x_3 \leq \dots \leq x_n$  from lowest to highest value, the median  $\tilde{x}$  is the data point separating the upper half of the data values from the lower half.

#### ~~Mean, Median, Mode Calculator~~

In statistics, 'Mean, Median and Mode' are the three different types of averages used in statistics. Mean is the average, where we add numbers and

## Get Free 9 1 Mean Median Mode And Range

divide by total number of numbers. Median is the middle value in the list of data. Mode is the number that occurs most frequently. The difference between the largest and smallest data is the range.

~~Mean Median Mode Range Calculator - Easycalculation.com~~

This resource is for teachers, tutors and students to test a student's knowledge in the area of Statistics and Properties for GCSE Maths. This should be used as part of a test, fill in the gaps and test cycle.

~~GCSE Maths 9 1, Mean, Median, Mode, Range, Quartiles ...~~

Definition- Mode is defined as the most frequent or common observation occurring in a dataset. A dataset can have 0,1 or more than 1 modes. The advantage of Mode is that it can be applied to any type of dataset, unlike Mean and Median which can not be applied to nominal data. It is also not affected by outliers.

~~Mean, Median and Mode - Definition, Types and Examples~~

How to find the mean, median, mode and range. The median is the middle value. To find the median, order the numbers and see which one is in the middle of the list. Eg 3, 3, 6, 13, 100 = 6;

~~BBC Bitesize Averages. Mean, Median, Mode and Range - BBC ...~~

Mean, median, mode and range. A measure of average is a value that is typical for a set of figures. Finding the average helps you to draw conclusions from data. The main types are mean, median and ...

~~Mean - Mean, median, mode and range - KS3 Maths Revision ...~~

Mode is Salt and vinegar Be aware that the mode can apply to numerical data as well (from the data used in the example for the median the mode would have been 56). Sometimes if no value/data occurs more often than others we say there is no mode. If two values occur the most we may say there are two modes (bi-modal).

~~Mean, Median & Mode | Edexcel GCSE Maths Revision Notes~~

The median is the middle value, so to rewrite the list in ascending order as given below: 13, 13, 13, 13, 14, 14, 16, 18, 21. There are nine numbers in the list, so the middle one will be  $\frac{9+1}{2} = \frac{10}{2} = 5$  = 5th number. Hence, the median is 14. The mode is the number that is repeated more often than any other, so 13 is the mode.

~~Mean Median Mode - Formulas | Solved Examples~~

Play this game to review Statistics. At Dominique's Donuts the number of donut holes in a bag can vary. Help Dominique find the mode.
