9780991542307: A Guide to Better Movement: The Science and ...

In the first part, the science of moving better, Hargrove discusses the essential qualities of good movement (coordination, responsiveness, distribution of effort, division of labor, position and alignment, relaxation and efficiency, timing, variability, comfort and individually customized). I especially love his section on relaxation and efficiency as I believe this to be a huge factor for the men and women I treat experiencing chronic pelvic pain.

To move better, decrease pain. To decrease pain, create controlled, safe movement with feedback. Some specific strategies Move slowly and gently. Pain is a threat warning, so give the mind time to process the change in the body, and don't make the change extreme. Use graded exposure. Introduce movements that have problematic in the past progressively.

In this episode, I sat down with one of my movement teachers and mentors, Todd Hargrove. Todd is a genius when it comes to understanding how the body works, the science of pain, and how to move with more freedom. He's the author of one of my absolute favorite books as well, A Guide to Better Movement, which I highly recommend.
