An accountant, or practitioner of accounting, keeps and analyzes financial records. A controller, or comptroller, oversees the accounting operations of a firm, including managing staff. Because...

Accountant vs. Controller: What's the Difference?

Definition: A control account, often called a controlling account, is a general ledger account that summarizes and combines all of the subsidiary accounts for a specific type. In other words, it's a summary account that equals the sum of the subsidiary account and is used to simplify and organize the general ledger.

What is a Control Account? - Definition | Meaning | Example

Management accounting control system is about the information flow within a company that is aimed at providing managers with both qualitative and non qualitative information which gives managers competitive edge. There is this believe that management accounting and control is about information generation.

Accounting Control and Controlling Accounting ...

From an accounting perspective, you'll look at the financial information required to run any organisation, and the information flow needed for managers to make business decisions. And of course control is a key element here: you'll learn how to use monitoring and reporting to make sure that organisations are governable and performing in the right way.
