principal book in which the commercial transactions of a company are recorded.". Before the days of accounting software, bookkeepers and accountants actually kept physical books, and each ledger was a separate physical book.. However, times have changed. And a simpler definition is probably more appropriate now too.

T Accounts are used in accounting to track debits and credits and prepare financial statements. It's a visual representation of individual accounts that looks like a "T", making it so that all additions and subtractions (debits and credits) to the account can be easily tracked and represented visually. This guide to T Accounts will give you examples of how they work and how to use them.
