© 2010 American Heart Association. All rights reserved. Primary Emphasis on Chest Compressions • All rescuers should, at a minimum, provide chest compressions. • If bystander not trained (adult arrest): Hands-Only CPR • If bystander trained and able: perform compressions and ventilations at rate of 30:2

2010 American Heart Association Guidelines for ...

2010 Guideline: For snakebites: Applying a pressure immobilization bandage with a pressure between 40 and 70 mm Hg in the upper extremity and between 55 and 70 mm Hg in the lower extremity around the entire length of the bitten extremity is an effective and safe way to slow lymph flow and therefore the dissemination of venom. Snugness is adequate if the bandage is comfortably tight and a finger can pass easily, but not loosely, under the bandage.

2010 American Heart Association Guidelines for First Aid ...

The 2010 AHA Guidelines for CPR and ECC make many of the same recommendations regarding rescue breathing as in 2005: Deliver each rescue breath over 1 second (Class IIa, LOE C). Give a sufficient tidal volume to produce visible chest rise (Class IIa, LOE C). 55 Use a compression to ventilation ratio ...
