And a handful of key differences in the design and operation.

Differences Between  
Air Conditioning &  
Refrigeration | Hunker  
Edition

In central air conditioning systems, air is passed over coils chilled by water, by brine, or by direct expansion of a volatile refrigerant. The

# Read Book Air Conditioner

chilled air is then distributed through ductwork. The water systems associated with air conditioning can be classified into three general categories: open recirculating cooling, air washers, and closed or open chilled water systems.
