There are other mods that remove the power tube but the Boris keeps it and let you use each pre amp tube as an independent preamp. 4 preamps for each reel to reel! I have a schematic and pictorial for an akai m7 which I have been told is identical.

Here are some sounds that I have recorded with my modified Akai / Roberts tube units. First up is some electric guitar samples of the amp section of a Pre+Amp in drive mode. My friend Myers Gilmer plays his PRS with humbucker through into the amp section of the Tablebeast Pre+Amp with an EH Worm pedal on track 2.

Tablebeast modified Akai / Roberts TB-2XP1 module. Please note, this 2 channel preamplifier is made using the amplifier electronics from Akai/Roberts Tube Reel to Reel decks. Each module is taken apart completely, parts are refurbished and a whole new circuit with all new wiring and capacitors are built in the donor chassis from the ground up!

Many of the online Akai/Roberts discussions recommend using the 4 input transformers as-found in these units as donors for the '4 channel' mod. Luckily I had a spare M67 in the junk pile (these things are readily available in the \$10 – \$50 price range) and so I pulled a transformer from it. Above: T. Walsh at Gold Coast Recorders

Akai / Roberts Pre+EQ Mod: About a year ago I started messing with some EQ circuits for a new design that incorporated a microphone preamplifier and an EQ in one Akai donor module. I knew that for the preamp part of the device I wanted something totally different than my Brute Force Preamp, so I settled on the mic preamp circuit from the old Tube RCA Broadcast Consoles.

I have a Roberts/Akai RTR that I want to mod to use primarily for the tube preamps for recording. But I want to use the amp sections occasionally.

Conventional practice (Rod Childers) is to pull the output tubes if you are using them for pre-amps only. This reduces the heat buildup and puts less draw on the PTs. But pulling and reinstalling the tubes requires pulling the units out of the rack or case. Not to mention the wear and tear on the tube and socket.
