This is the first book to focus on the relationships which men formed with their wives in early modern England, making it an important contribution to a new understanding of English, social, family, and gender history. Dr Foyster redresses the balance of historical research which has largely concentrated on the public lives of prominent men. The book looks at youth and courtship before marriage, male fears of their wives' gossip and sexual betrayal, and male friendships before and after marriage. Highlighted throughout is the importance of sexual reputation. Based on both legal records and fictional sources, this is a fascinating insight into the personal lives of ordinary men and women in early modern England.

The English Novel, Volume I:1700 to Fielding collects a series of previously-published essays on the early eighteenth-century novel in a single volume, reflecting the proliferation of theoretical approaches since the 1970s. The novel has been the object of some of the most exciting and important critical speculations, and the eighteenth-century novel has been at the centre of new approaches both to the novel and to the period between 1700 and 1750. Richard Kroll's introduction seeks to frame the contributions by reference to the most significant critical discussions. These include: the question of whether and how we can talk about the 'rise' of the novel; the vexed question of what might constitute a novel; the relationship between the novel and possibly competing genres such as history or the romance; the relationship between early male writers like Defoe and popular novels by women in the early eighteenth century; the general ideological role played by novels relative to eighteenth-century culture (are they means of ideological conscription or liberation?); poststructuralist analyses of identity and gender; and the emergence of sentimental and domestic codes after Richardson. Since the modern European novel is often thought to have been formed in this period, these debates have clear implications for students of the novel in general as well as for those interested in the early enlightenment. Headnotes place each essay within the map of these wider concerns, and the volume offers a useful further reading list. Taken as a whole, this collection encapsulates the state of criticism at the present moment.

This title, first published in 1979, is a glossary of the bawdy vocabulary that was used in Renaissance Drama. One of the primary functions of this gloss of literary bawdy is to interpret imaginative uses of the language rather than simply record the generally accepted uses and meanings, with its principal task to make the dialogue of the plays more intelligible to the reader. With examples of bawdy language used in the works of Shakespeare, Ben Jonson and John Webster amongst many others, this title will be of great interest to students of literature and performance studies.

Providing an alphabetical listing of sexual language and locution in 16th and 17th-century English, this book draws especially on the more immediate literary modes: the theatre, broadside ballads, newsbooks and pamphlets. The aim is to assist the reader of Shakespearean and Stuart literature to identify metaphors and elucidate meanings; and more broadly, to chart, through illustrative quotation, shifting and recurrent linguistic patterns. Linguistic habit is closely bound up with the ideas and assumptions of a period, and the figurative language of sexuality across this period is highly illuminating of socio-cultural change as well as linguistic development. Thus the entries offer as much to those concerned with social history and the history of ideas as to the reader of Shakespeare or Dryden.

More than fifty specialists have contributed to this new edition of volume 2 of The Cambridge Bibliography of English Literature. The design of the original work has established itself so firmly as a workable solution to the immense problems of analysis, articulation and coordination that it has been retained in all its essentials for the new edition. The task of the new contributors has been to revise and integrate the lists of 1940 and 1957, to add materials of the following decade, to correct and refine the bibliographical details already available, and to re-shape the whole according to a new series of conventions devised to give greater clarity and consistency to the entries.
