So, this is the reason why Angularjs Autocomplete is considered as one of the essential functionalities in application. For implementing autocomplete there is inbuilt package angular-ng-autocomplete in Angularjs. Angular-ng-autocomplete has many inbuilt features and these features make autocomplete more user-friendly for a user and audience.

### [Angularjs 718|910 Autocomplete|angular ng autocomplete ...](#)

In 2010, Google released AngularJS, an open source, JavaScript-based frontend structure for developing single-page applications (SPAs) for the internet. With its move to version 2.0 in 2016, the framework's name was shortened to Angular. AngularJS is still being developed and used, but Angular's advantages mean it's a smart idea to migrate to the newer version.
