In simple terms, natural light is light that is generated naturally, the common source of which is the Sun. This is as opposed to artificial light, which is typically produced by electrical appliances such as lamps. Natural light is received during daylight hours and covers the visible spectrum with violet at one

~~Natural light - Designing Buildings Wiki~~

Natural Light Natural light is a dynamic and ephemeral tool for expressing the quality of space. Whether it's used in the diffuse illumination of a museum gallery or as a dramatic and variable figure within an enclosed space, the formal and architectural intentions of daylight should be directly associated with the evaluation of its quality.

~~Natural Light | MIT Architecture~~

"Architecture which enters into a symbiosis with light does not merely create form in light, by day and at night, but allow light to become form." Richard Meier – Architect "I sense Light as the giver of all presences, and material as spent Light. What is made by Light casts a shadow, and the shadow belongs to Light."

~~Natural Light - Clean Aesthetics | Life of an Architect~~

Architectural Solutions to Increase Natural Light Use Glass Floor (or Ceiling) to Add More Light This a rather daring idea for increasing natural light and perhaps not a solution for the nervous. If you have a light-filled ground floor or upper level, you could install a glass floor to let the light into the room below.

~~The Architecture of Natural Light book by Plummer, Henry~~

About The Architecture of Natural Light Shelter and natural light are fundamental elements of architecture. The first is concerned with protection from natural elements; the second with the creative and sometimes spiritual interaction between the man-made and the natural worlds. One is solid and static, the other illuminates and animates.

~~The Architecture of Natural Light by Henry Plummer ...~~

The thesis discusses the characteristics of natural light that are visible inside concrete buildings designed in the late twentieth century. The study addresses three major objectives. First is to identify the characteristics of natural light visible inside these spaces. Second is to understand the use of natural light to illuminate different spaces.
