Arduino Practical Programming For Beginners

The Arduino programming language is based on a very simple hardware programming language called processing, which is similar to the C language. After the sketch is written in the Arduino IDE, it should be uploaded on the Arduino board for execution. The first step in programming the Arduino board is downloading and installing the Arduino IDE.

Arduino programming for beginners - HackerEarth Blog

Programs in the Arduino language are called "sketches". An Arduino sketch is comprised of

Get Free Arduino Practical Programming For Beginners

two main parts: the setup function and the loop function. setup() - the setup() function is automatically executed at the very beginning of an Arduino program. Inside this function you will initialize variables, pins, and any libraries that you might be using in your sketch.
