1) The primary role of the sterile processing professional is that of infection control prevention. It is a primary duty of the sterile processor to protect patients from pathogenic microorganisms via the roles played in the sterile processing department.
2) The secondary role (though equally important to the first) is

STERILE PROCESSING BASIC TRAINING COURSE

The Sterile Processing Department (Central Supply, or Sterile Supply as it is also known), comprises that service within the hospital in which medical/surgical supplies and equipment, both sterile and, are cleaned, prepared, processed, stored, and issued for patient care. Until the 1940s, medical/surgical supplies were, for the most part, processed and maintained in the departments and patient care areas in which they were to be used.
