The N52 engine uses BMW's VANOS system, which is a variable valve timing system. The VANOS solenoids are responsible for controlling how much oil flows to the cam gears, which in turn controls the opening and closing of the valves. Understanding VANOS is rather complicated, although you can read our full guide about it here.

BMW Complete Car Engines for sale | eBay

In the M series of engines (M52 TU, M54, M56), one solenoid is used to control the timing of each camshaft. On the N54 and S54 engine the timing of each camshaft is controlled by two solenoids, one to retard and the other to advance the timing. Removal and installation of the VANOS unit on these engines requires the use of special BMW camshaft timing tools and techniques. With the use of these ...
