Feminism has dramatically influenced the way literary texts are read, taught and evaluated. Feminist literary theory has deliberately transgressed traditional boundaries between literature, philosophy and the social sciences in order to understand how gender has been constructed and represented through language. This lively and thought-provoking Companion presents a range of approaches to the field. Some of the essays demonstrate feminist critical principles at

work in analysing texts, while others take a step back to trace the development of a particular feminist literary method. The essays draw on a range of primary material from the medieval period to postmodernism and from several countries, disciplines and genres. Each essay suggests further reading to explore this field further. This is the most accessible guide available both for students of literature new to this developing field, and for students of gender studies and readers interested in the interactions of feminism, literary criticism and literature.

Organisations, and of public officials is one of the most important and most controversial topics of international law. The book takes up new trends and challenges in this field and assesses them within the framework of global constitutionalism and multilevel governance. Contains chapters in both English and French.

The Oxford Handbook of the History of International Law provides an authoritative and original overview of the origins, concepts, and core issues of international law. The first comprehensive Handbook on the history of international law, it is a truly unique contribution to the literature of international law and relations.

Pursuing both a global and an interdisciplinary approach, the Handbook brings together some sixty eminent scholars of international law, legal history, and global history from all parts of the world. Covering international legal developments from the 15th century until the end of World War II, the Handbook consists of over sixty individual chapters which are arranged in six parts. The book opens with an analysis of the principal actors in the history of international law, namely states, peoples and nations, international organisations and courts, and civil society actors. Part Two is devoted to a number of key themes of the history of international law, such as peace and war, the sovereignty of states, hegemony,

religion, and the protection of the individual person. Part Three addresses the history of international law in the different regions of the world (Africa and Arabia, Asia, the Americas and the Caribbean, Europe), as well as 'encounters' between non-European legal cultures (like those of China, Japan, and India) and Europe which had a lasting impact on the body of international law. Part Four examines certain forms of 'interaction or imposition' in international law, such as diplomacy (as an example of interaction) or colonization and domination (as an example of imposition of law). The classical juxtaposition of the civilized and the uncivilized is also critically studied. Part Five is concerned with

problems of the method and theory of history writing in international law, for instance the periodisation of international law, or Eurocentrism in the traditional historiography of international law. The Handbook concludes with a Part Six, entitled "People in Portrait", which explores the life and work of twenty prominent scholars and thinkers of international law, ranging from Muhammad al-Shaybani to Sir Hersch Lauterpacht. The Handbook will be an invaluable resource for students and scholars of international law. It provides historians with new perspectives on international law, and increases the historical and cultural awareness of scholars of international law. It is the standard reference work for the global history

Investment treaty arbitration has a hybrid nature combining public international law (as regards its substance) with elements of international commercial arbitration (mainly as regards procedure). However, in essence and function it deals with a special, internationalised form of judicial review of governmental conduct that is more akin to the judicial control of governmental action provided for by national administrative and constitutional law than to either classic inter-state dispute resolution or international commercial arbitration. This has been recognised in some academic writing and several

awards, where reference to national administrative law concepts and principles of international law-based judicial review of governmental action, such as international trade or human rights law, is used to help specify and apply the open-ended concepts of investment treaties. In-depth conceptualization is however often lacking. The current study is the first, pioneering effort to bring these under-developed ad hoc references to comparative and international administrative law concepts into a deeper theoretic and systematic framework. The book thus intends to develop a 'bridge' between treaty-based international investment arbitration and comparative administrative law on both a theoretical and practical

level. The major obligations in investment treaties (indirect expropriation, fair and equitable treatment, national treatment, umbrella/sanctity of contract clause) and major procedural principles will be compared with their counterpart in comparative public law, both on the domestic as well as international level. That 'bridge' will allow international investment law to benefit from the comparative public law experience, which could enhance its legitimacy, its political acceptance, and its ability to develop more finely-tuned interpretations of central treaty obligations.

To what extent is the language of judicial opinions responsive to the political and social context in which constitutional courts operate? Courts are reason-giving institutions, with argumentation playing a central role in constitutional adjudication. However, a cursory look at just a handful of constitutional systems suggests important differences in the practices of constitutional judges, whether in matters of form, style, or language. Focusing on independently-verified leading cases globally, a combination of qualitative and quantitative analysis

offers the most comprehensive and systematic
account of constitutional reasoning to date. This
analysis is supported by the examination of eighteen
legal systems around the world including the
European Court of Human Rights and the European
Court of Justice. Universally common aspects of
constitutional reasoning are identified in this book,
and contributors also examine whether common law
countries differ to civil law countries in this respect.

The past decade has witnessed change in the ways

professional quality of the judicial candidates, and, for this purpose, both European systems have put in place various advisory panels or selection committees that are called to evaluate the aptitude of the candidates put forward by the national governments. Are these institutional reforms successful in guaranteeing greater quality of the judicial candidates? Do they increase the legitimacy of the European courts? Has the creation of these advisory panels in any way altered the institutional balance, either horizontally within the international organizations, or vertically, between the respective organization and its Member States? Above all, has the spree of 'judicial comitology' as currently

practiced a good way for selecting Europe's judges?

These and a number of other questions are addressed in this topical volume in a comparative and interdisciplinary prospective. The book is structured into two elements: first, how the operation of the new selection mechanisms is captured and analyzed from different vantage points, and secondly, having mapped the ground, the book critically and comparatively engages with selected common themes, examining the new mechanisms with respect to values and principles such as democracy, judicial independence, transparency, representativeness, and legitimacy.

This Handbook brings together scholars whose essays discuss significant issues with regard to international organization as a process and international organizations as institutions. Although the focus is on intergovernmental organizations (IGOs), non-governmental organizations (NGOs) are discussed where relevant. The handbook is divided into six parts: Documentation, Data Sets and Sources International Secretariats as Bureaucracies Actors within International Bureaucracies Processes within International Bureaucracies Challenges to International Organizations, and Expanding International Architectures. Realizing Utopia is a collection of essays by a group of innovative international jurists. Its contributors reflect on some of the major legal problems facing the international community and analyse the inconsistencies or inadequacies of current law. They highlight the elements - even if minor, hidden, or emerging - that are likely to lead to future changes or improvements. Finally, they suggest how these elements can be developed, enhanced, and brought

to fruition in the next two or three decades, with a view to achieving an improved architecture of world society or, at a minimum, to reshaping some major aspects of international dealings. Contributions to the book thus try to discern the potential, in the present legal construct of world society, that might one day be brought to light in a better world. As the impact of international law on national legal orders continues to increase, this volume takes stock of how far international law has come and how it should continue to develop. The work features an impressive list of contributors, including many of the leading authorities on international law and several judges of the International Court of Justice.

For the time being, the political project of basing the European Union on a document entitled 'Constitution' has failed. The second, revised and enlarged edition of this volume retains its title nonetheless. Building on a scholarly rather than black-letter law account, it shows European constitutional law as it looks following the Treaty of Lisbon, with the EU's foundational treaties mandating the exercise of public authority, establishing a hierarchy of norms and legitimising legal acts, providing for citizenship, and granting fundamental rights. In this way the treaties shape the relations between legal orders, between public interest regulation and market economy, and

demonstrate in detail how a constitutional approach furthers understanding of the core issues of EU law, how it offers theoretical and doctrinal insights, and how it adds critical perspective. From Reviews of the First Edition: "...should be mandatory reading for anyone who wants to get a holistic perspective of the academic debate on Europe's constitutional foundations...It is impossible to present the richness of thought contained in the 833 pages of the book in a short review."
