The Bronsted-Lowry definition of acids
and bases Bronsted Lowry Acid And Base
Using the Bronsted-Lowry definition, an
acid-base reaction is any reaction in which a
proton is transferred from an acid to a base.
We can use the Bronsted-Lowry definitions
to discuss acid-base reactions in any solvent,
as well as those that occur in the gas phase.

The Bronsted-Lowry acid-base theory (or
Bronsted Lowry theory) identifies strong
and weak acids and bases based on whether
the species accepts or donates protons or H^+ .
According to the theory, an acid and base
react with each other, causing the acid to
form its conjugate base and the base to form
its conjugate acid by exchanging a proton.
The theory was proposed independently by

Bronsted Lowry Theory of Acids and Bases
The Brønsted – Lowry theory is an acid – base reaction theory which was proposed independently by Johannes Nicolaus Brønsted and Thomas Martin Lowry in 1923. The fundamental concept of this theory is that when an acid and a base react with each other, the acid forms its conjugate base, and the base forms its conjugate acid by exchange of a proton. This theory is a generalization of the Arrhenius theory.

Bronsted-Lowry Theory - Definition of acid and base and ...

A Brønsted-Lowry acid is any species that can donate a proton (H^+) to another molecule. A Brønsted-Lowry base is any species that can accept a proton from another molecule. In short, a Brønsted-Lowry acid is a proton donor (PD), while a Brønsted-Lowry base is a proton acceptor (PA).

What are Bronsted-Lowry acids and bases?
Bronsted Acid is an H^+ donor, Bronsted Base is an H^+ acceptor. Usually Bronsted Acids have an H bonded to a halogen or an oxygen. A base, usually OH^- or H_2O , will have a lone pair of electrons that forms a bond with an H^+ on the acid.

a Bronsted-Lowry base accepts hydrogen ions. Another way of looking at it is that a Bronsted-Lowry acid donates protons, while the base accepts protons. Species that can either donate or accept protons, depending on the situation, are considered to be amphoteric.
