The Building Blocks of Expert Systems Every expert system consists of two principal parts: the knowledge base; and the reasoning, or inference, engine. The knowledge base of expert systems contains both factual and heuristic knowledge. Factual knowledge is that knowledge of the task domain that is widely shared, typically found in textbooks or journals, and commonly agreed upon by those ...

The Building Blocks of Expert Systems Every expert system ...

11.6 Roles in Expert System Development. Three fundamental roles in building expert systems are: 1. Expert - Successful ES systems depend on the experience and application of knowledge that the people can bring to it during its development. Large systems generally require multiple experts. 2. Knowledge engineer - The knowledge engineer has a dual task. This person should be able to elicit knowledge from the expert, gradually gaining an understanding of an area of expertise.

Expert Systems and Applied Artificial Intelligence

Expert systems (ES) are one of the prominent research domains of AI. It is introduced by the researchers at Stanford University, Computer Science Department. The expert systems are the computer applications developed to solve complex problems in a particular domain, at the level of extra-ordinary ...
