3) Check Fuel Transfer Pump – During the start-up of the Caterpillar 3306 engine the minimum fuel pressure needed for the fuel transfer pump should be 3 psi. If the fuel pressure is less than 3 psi it is necessary to change the fuel filter element. If that does not change the pressure look for air in the fuel system also known as cavitation.

Common Caterpillar 3306 Engine Starter Problems | Big Bear ...

electric Starter motor assembly An electric starter will take stored electrical energy from a battery (or sometimes a capacitor) and convert it into torque at the starter's pinion gear. The pinion then engages with the ring gear that is part of the engine's flywheel and turns the flywheel that rotates the engine's crankshaft.
