Chapter 14

14-2 A machine is something that changes a force and makes work easier. Machines may change a force in three ways. 1. increase the size of the force; 2. change the direction of the force; 3. increase the distance over which the force acts. The force you put into a machine is the input force. The distance over which the

Acces PDF

Chapter 14

input force acts is the
input distance. The
work you do on the
machine is the work
input.
