

## Chapter 8 The Nervous System

Thank you for downloading **chapter 8 the nervous system**. Maybe you have knowledge that, people have search numerous times for their chosen books like this chapter 8 the nervous system, but end up in infectious downloads. Rather than reading a good book with a cup of coffee in the afternoon, instead they are facing with some harmful bugs inside their laptop.

chapter 8 the nervous system is available in our book collection an online access to it is set as public so you can download it instantly. Our book servers spans in multiple locations, allowing you to get the most less latency time to download any of our books like this one. Kindly say, the chapter 8 the nervous system is universally compatible with any devices to read

Chapter 8 The Nervous System Think of the nervous system as a computer – lots of twisted wires (nerve fibers) that all come together to form a power cable (bundle) which sends and receives signals. It all works together to enable the computer (body) to take in a message – send it to the circuit board (brain) – translate it so the computer (our mind) can act on the information it has received.

*Chapter 8-The Nervous System Flashcards*

A chemical substance in the body tissues that facilitates the transmission of nerve impulses from one nerve to another. It has a stimulant (or excitatory) effect on some parts of the body (such as the skeletal muscles) and a depressant (or inhibitory) effect on other parts of the body (such as the heart muscle); also known as a neurotransmitter (ah-seh-till-KOH-leen)

*Chapter 8 The Nervous System Flashcards*

Nervous system consists of special cells called nerve cells or neurons. It has a main cell body called cyton. It gives out many processes called dendrites. From it a very long process is given out. It is called axon or nerve fibre. The cell body has a nucleus.

*Selina Concise Biology Class 8 ICSE Solutions – Nervous System*

The nervous system is best defined as a system of cells, tissues, and organs that regulates the bodys responses to internal and external stimuli.
