Multiplatform phone (MPP) firmware enables the Cisco® IP Phone 6800, 7800, and 8800 Series to work with approved third-party call control systems as well as with Cisco Webex® Calling. The feature set provided by this firmware is not identical to that of the firmware designed and built for use with Cisco Unified Communications Manager, but there are many similarities.

Summary. A vulnerability in the Session Initiation Protocol (SIP) call-handling functionality of Cisco IP Phone 7800 Series, IP Phone 8800 Series, and Wireless IP Phone 8821 could allow an unauthenticated, remote attacker to cause a denial of service (DoS) condition on an affected phone. The vulnerability is due to incomplete input validation of SIP Session Description Protocol (SDP) parameters by the SDP parser of an affected phone.
