The second generation of Cisco Nexus switches (as in the referenced Cisco Nexus 93180) utilize a Leaf-and-Spine Engine (LSE) ASIC which DOES NOT have the same limitations as the ALE ASICs in the first generation Nexus 9K switches. However, there are still limitations and caveats for the uplink ports on the LSE based, second generation 9300-EX/FX switches which should be verified against the guidelines/limitations documentation for either the NX-OS operating mode or the Cisco ACI operating mode.
