clinical and functional histology for medical students

Clinical and functional correlations provide medical students with important patient-centered information. The theme is that if you know histology, then pathology becomes (almost) self-evident. The focus on figures and legends will appeal to students who enjoy visual learning.

However, much less is known about their attitudes toward the clinical importance of histology. Using Thurstone and Chave methods to assess attitudes, over 2,000 early stage medical students across Europe provided responses to a survey that tested the hypothesis that the students have a high regard for histology's clinical relevance.
