The musculoskeletal system is made up of two systems: the skeletal system and the muscular system. The skeletal system protects the body and gives it its shape and form. It's made up of bones, joints, ligaments (fibers that connect bones to other bones), tendons (fibers that connect muscles to bones), and cartilage.

The first conditions listed under Diseases of the Musculoskeletal System and Connective Tissue (M00-M99) are arthropathies. An arthropathy is a pathology or abnormality of a joint; arthritic conditions are classified in this section. Many of the arthropathy codes require use of another code first to specify an underlying disease.

Two new Category III codes for two musculoskeletal diagnostic procedures were added: 0547T – Bone material quality testing by micro-indentation (s) of the tibia (s), with results reported as a score. This code completes with the DEXA scan (77080, 77081) in trying to measure how strong a bone is such as the tibia.
