The Collaborative Planning, Forecasting, and Replenishment (CPFR) initiative is an increasingly popular paradigm that helps the supply chain better coordinate activities to serve customers with improved demand forecasting and production scheduling.

Collaborative planning, forecasting, and replenishment ...  
Collaborative Planning, Forecasting, and Replenishment (CPFR) is a collaborative business practice that enables partners to have visibility into one another's demand, order forecast and promotional data to anticipate and satisfy future demand. This is done through a systematic process of information and knowledge sharing.

ALL about Collaborative Planning CPFR - 12manage  
One of the key enablers of efficiencies and improvements across supply chains is to create and use collaborative planning, forecasting and replenishment ( CPFR) strategies across organizations ' boundaries. CPFR strategies allow aligning of multiple S&OP processes and jointly plan supply chain activities to ensure that the joint business plans between organizations are respected, while minimizing costs and maximizing efficiency from end-to-end of your supply chain.

Collaborative Planning, Forecasting & Replenishment (CPFR)  
Collaborating Planning, Forecasting, and Replenishment (CPFR) In the 1990s, big retailers (beginning with Walmart) and their consumer goods partners identified unmet potential in forecast accuracy, supply chain coordination, and general supply chain visibility. Their awareness gave rise to Collaborative Planning, Forecasting, and Replenishment, an end-to-end supply chain scheme designed to close the loop in the consumer-goods-to-retail supply chain.
