YOU CAN'T MAKE THIS STUFF UP! Here is a hilarious collection that catches real-life knuckleheads in outrageous acts of brazen stupidity, giving new meaning to that famous four-letter word: "DUH"! * The Oregon resident who was waxing his 1984 Pontiac--and somehow managed to shove the antenna up his nose . . . GRANDMOTHER OF EIGHT MAKES HOLE IN ONE * The Atlanta Braves pitcher who was treated for five-inch-long welts after he tried to iron his polo shirt while wearing it . . . MINERS REFUSE TO WORK AFTER DEATH * The inmate at a Chesapeake Correctional Facility who filed a five million dollar lawsuit against himself . . . DRUNK GETS NINE MONTHS IN VIOLIN CASE * The woman who couldn't stand the discomfort of having a callus on her right foot, so she blew off her big toe with a shotgun . . . Radio personality John "Kato" Machay's lively compilation of news stories, headlines, and courtroom gaffes proves hands down that truth is dumber than fiction! REMEMBER: To err may be human, but to laugh out loud is divine.

This popular Build-It-Yourself (BIY) PC book covers every step in building one's own system: planning and picking out the right components, step-by-step assembly instructions, and an insightful discussion of why someone would want to do it in the first place.

Covers installation, configuration, Registry manipulation, network management, Active Directory, and security

Filled with pragmatic insights, proactive strategies, and best practices, The New CFO Financial Leadership Manual, Second Edition is destined to become your essential desktop companion. This thorough guidebook is essential reading for the CFO requiring an overview of strategies, measurement and control systems, financial analysis tools, funding sources, and management improvement tips.

This book describes the most frequently used high-speed serial buses in embedded systems, especially those used by FPGAs. These buses employ SerDes, JESD204, SRIO, PCIE, Aurora and SATA protocols for chip-to-chip and board-to-board communication, and CPCIE, VPX, FC and Infiniband protocols for inter-chassis communication. For each type, the book provides the bus history and version info, while also assessing its advantages and limitations. Furthermore, it offers a detailed guide to implementing these buses in FPGA design, from the physical layer and link synchronization to the frame format and application command. Given its scope, the book offers a valuable resource for researchers, R&D engineers and graduate students in computer science or electronics who wish to learn the protocol principles, structures and applications of high-speed serial buses.

Detailed coverage of hardware circuits, software concepts and interfaces, test equipments and diagnostic aids; complete hardware design at the systems and components level of an IBM PC and its clones; common problems with their detailed troubleshooting procedure; practical tips for troubleshooting and quick diagnosis; systematic analysis of the POST sequence.

Annotation Strategies for configuring, monitoring, and troubleshooting new Cisco telephony software! First book with specific coverage of Cisco CallManager written by its key developers. Includes specific configuration examples, configuration guidelines, troubleshooting tips, and case studies. Provides detailed information about such complex issues as Cisco CallManager routing and diagnostics. Cisco CallManager Fundamentals provides reference information about Cisco CallManager. This book fully details the innerworkings of Cisco CallManager, which will empower those responsible for designing and maintaining the system with the availability to make intelligent decisions about what, when, and how features within Cisco CallManager can be used. John Alexander is a software development manager for Cisco Systems. John managed the development of the call processing softwares as well as software development tasks. Chris Pearce has been a software engineer in telecommunications for the past nine years. In 1994 he was one of the first four engineers that designed and implemented what would eventually become the Cisco CallManager. Anne Smith is a senior technical writer at Cisco Systems, author of over two-dozen user guides, online help files, and Web-based documentation for various software and telephony companies. Delon Whetten is the technical lead of the Cisco CallManager software group at Cisco Systems. He has been involved in the design and development of message switching, voice messaging, video teleconferencing, and Voice over IP call management systems for the last 24 years.
