~~Lucile Salter Packard Children's Hospital STANFORD ...~~

Code 95827 specifies "overnight EEG." This code is a predecessor to polysomnography codes. It is used most commonly in sleep labs for patients receiving a full EEG during an overnight stay in order to assess for seizures as a cause of a parasomnia. It has been used for the physician interpretation of that EEG record.

~~Coding and Billing Considerations | Neupsy Key~~

A sleep-deprived electroencephalogram (EEG) is an EEG that is performed on a person who has experienced a less-than-normal amount of sleep. To perform this test, an EEG technician attaches special electrodes to the scalp of a person who is sleep deprived. Through these electrodes, he records electrical impulses in the brain, and the recorded electrical activity appears on a computer screen for ...
