A strikingly original exploration of what it might mean to be authentically human in the age of artificial intelligence, from the author of the critically-acclaimed Interior States. "Meghan O'Gieblyn is a brilliant and humble philosopher, and her book is an explosively thought-provoking, candidly personal ride I wished never to end ... This book is such an original synthesis of ideas and disclosures. It

introduces what will soon be called the O’Gieblyn genre of essay writing.” –Heidi Julavits, author of *The Folded Clock* For most of human history the world was a magical and enchanted place ruled by forces beyond our understanding. The rise of science and Descartes's division of mind from world made materialism our ruling paradigm, in the process asking whether our own consciousness—i.e., souls—might be illusions. Now the inexorable rise of technology, with artificial intelligences that surpass our comprehension and control, and the spread of digital metaphors for self-understanding, the core questions of existence—identity, knowledge, the very nature and purpose of life itself—urgently require rethinking. Meghan O’Gieblyn tackles this challenge with philosophical rigor, intellectual reach, essayistic verve, refreshing originality, and an ironic sense of contradiction. She draws deeply and sometimes humorously from her own personal experience as a formerly religious believer still haunted by questions of faith, and she serves as the best possible guide to navigating the territory we are all entering.

NATIONAL BOOK CRITICS CIRCLE AWARD WINNER • The first full history of Black America’s shocking mistreatment as unwilling and unwitting experimental subjects at the hands of the medical establishment. No one concerned with issues of public health and racial justice can afford not to read this masterful book. “[Washington] has unearthed a shocking amount of information and shaped it into a riveting, carefully documented book.” –*New York Times* From the era of slavery to the present day, starting with the earliest encounters between Black Americans and Western medical researchers and the racist pseudoscience that resulted, *Medical Apartheid* details the ways both slaves and freedmen were used in hospitals for experiments conducted without their knowledge—a tradition that continues today within some black populations. It reveals how Blacks have historically been prey to grave-robbing as well as unauthorized autopsies and dissections. Moving into the twentieth century, it shows how the pseudoscience of eugenics and social Darwinism was used to justify experimental exploitation and shoddy medical treatment of Blacks. Shocking new details about the government’s notorious Tuskegee experiment are revealed, as are similar, less-well-known medical atrocities conducted by the government, the armed forces, prisons, and private institutions. The product of years of prodigious research into medical journals and experimental reports long undisturbed, *Medical Apartheid* reveals the hidden underbelly of scientific research and makes possible, for the first time, an understanding of the roots of the African American health deficit. At last, it provides the fullest possible context for comprehending the behavioral fallout that has caused Black Americans to view researchers—and indeed the whole medical establishment—with such deep distrust.

The Centaur centres on Terence O'Malley, a journalist of mystical temperament who is at odds with the pace and materialism of the modern world, and instead countenances a sense of kinship with the universe. This mystical novel weaves a fascinating tale while, at the same time, making a passionate plea for a lifestyle that is closer to nature.

"A dreamlike novel about a young historian and a persuasive and beguiling stranger coming together in modern-day Kolkata, India to transcribe an ancient journal. A collection of paper, parchment, and skins, the journal tells of bloodshed, kidnapping, magic and shapeshifting, set against the harsh landscapes of the 17th-Century Mughal Empire. It reveals the story of hunters and prey, lovers and the beloved, and, in the end, the choice to be transformed, or be quarry"--

The Red and the Black Stendhal - First published in 1830, The Red and the Black, is widely considered the masterpiece of 19th century French author Marie-Henri Beyle, known more commonly by his pen name, Stendahl. It follows the ambitions of Julien Sorel, a young man raised in the French countryside who wishes to rise above his provincial station by climbing the social ranks of Parisian society. Through a series of events, Juliens talent and hard work give way to deception and hypocrisy when he realizes the limitations for advancement of a sincere and honest man of humble origins. Although Julien achieves much which he aspires to, ultimately his pride gets the better of him when he commits a violent crime of passion, leading to his tragic downfall. Through the deep psychological introspection of Julien we see Stendhals unique literary genius, the remarkable way in which he allows readers to live in the minds of his characters. Set against the backdrop of the July Revolution of 1830, The Red and the Black is a narrative which embodies the rich social conflict of that time. This edition is translated with an introduction by Horace B. Samuel.
