rapidly in low- and middle-income countries than in high-income countries.

Diabetes - World Health Organization
Reasons of the Rise in Type 2 Diabetes.
One of the most common causes of the rise in type 2 diabetes is the increase in obesity among children and adults in the

Access Free Diabetes On The Rise A Costly Epidemic

country and according to a research 55% of type 2 diabetes cases result because of obesity. Typically, when you put on more weight, the body cannot process insulin and it stays in blood instead of being converted into energy.

Why Type 2 Diabetes Is On The Rise?

Access Free Diabetes On The Rise A Costly Epidemic

But your body can't produce enough or any insulin to cope with this, so your blood sugars rise. Your body is working overtime to fight the illness, making it harder to manage your diabetes. This means you're more at risk of having serious blood sugar highs and lows, potentially leading to DKA (diabetic
