Welcome to Discovering Statistics. This website brings together many of my free resources to help you to get to grips with statistics. These include handouts, tutorials, extracts from my books, videos and blogs. It's an adventure in statistics.

Discovering Statistics – The adventure begins

Pearson's correlation coefficient, r (or Pearson's product-moment correlation coefficient to give it its full name), is a standardized measure of the strength of relationship between two variables. It can take any value from -1 (as one variable changes, the other changes in the opposite direction by the same amount), through 0 (as one variable changes the other doesn't change at all), to $+1$ (as one variable changes, the other changes in the same direction by the same amount).

Bayes Factors are pretty easy to do using Richard Morey's excellent BayesFactor package in R (Morey & Rouder, 2014). There's a lot more technical stuff to consider, which I won't get into ... for example, to do this properly we really need to set some prior believe in our hypothesis.
