Describe understanding of the anatomy and physiology of body systems and homeostasis for health. Describe understanding of the biophysical concepts and mechanisms involved in normal activities of living.

Describe understanding of the anatomy and physiology of ...

Anatomy, in layman terms, is the study of the relationship and structure of human body parts. In other words, it gives us a clear picture of each of the different body parts and they relate to other parts. Physiology, on the other hand, studies the whole body as a unit and the function of each part.
