In striving to become cosmopolitan, global cities aim to attract highly-skilled workers while relying on a vast underbelly of low-waged, low status migrants. This book tells the story of one such city, revealing how national development produces both aspirations to be cosmopolitan and to improve one's class standing, along with limitations in achieving such aims. Through the analysis of three different groups of workers in Singapore, Ye shows that cosmopolitanism is an exclusive and aspirational construct created through global and national development strategies, transnational migration and individual senses of identity. This dialectic relationship between class and cosmopolitanism is never free from power and is constituted through material and symbolic conditions, struggles and violence. Class is also constituted through 'the

self' and lies at the very heart of different constructions of personhood as they intersect with gender, race, sexuality, ethnicity and nationality.

The rapid conversion of land to urban and suburban areas has profoundly altered how water flows during and following storm events, putting higher volumes of water and more pollutants into the nation's rivers, lakes, and estuaries. These changes have degraded water quality and habitat in virtually every urban stream system. The Clean Water Act regulatory framework for addressing sewage and industrial wastes is not well suited to the more difficult problem of stormwater discharges. This book calls for an entirely new permitting structure that would put authority and accountability for stormwater discharges at the municipal level. A number of additional actions, such as conserving natural areas, reducing hard surface cover (e.g., roads and parking lots), and retrofitting urban areas with features that hold and treat stormwater, are recommended.
