Employment Conditions and Health Inequalities

The Employment Conditions Knowledge Network

(EMCONET) developed models and measures to clarify how different types of jobs, conditions of underemployment and the threat of becoming unemployed affect workers ' health.

Pathways by which employment and working conditions affect the health of workers and their families were identified, with the goal of demonstrating how such knowledge can be translated into labour and health policy measures.

of the Employment Conditions Knowledge Network (EMCONET), 2007. The aim of this Report is to provide a rigorous analysis on how employment relations affect different population groups, and how this knowledge may help identify and promote worldwide effective policies and institutional changes to reduce health inequalities derived from these employment relations.
