Emphysema is a lung condition that causes breathing difficulties. This and chronic (or long-term) bronchitis are the two main components of COPD. If you have emphysema, the walls of the air sacs in your lungs are damaged. Healthy lungs are made up of millions of tiny air sacs (alveoli) with elastic walls.

Emphysema | British Lung Foundation

Emphysema is a lung condition that causes shortness of breath. In people with emphysema, the air sacs in the lungs (alveoli) are damaged. Over time, the inner walls of the air sacs weaken and rupture — creating larger air spaces instead of many small ones.

Emphysema | Definition and Patient Education

Emphysema is a respiratory disease. In this condition, millions of the lungs' tiny air sacs (alveoli) stretch out of shape or rupture. As these thin, fragile air sacs become damaged or destroyed, the lungs lose their natural elasticity. They become unable to empty easily.

Emphysema Guide: Causes, Symptoms and Treatment Options

Emphysema is a long-term, progressive disease of the lungs that primarily causes shortness of breath due to over-inflation of the alveoli (air sacs in the lung). In people with emphysema, the lung tissue involved in the exchange of gases (oxygen and carbon dioxide) is impaired or destroyed.

Emphysema: Symptoms, Signs, Treatment & Life Expectancy

Emphysema is a destructive disease of the lung in which the alveoli (small sacs) that promote oxygen exchange between the air and the bloodstream are destroyed. Smoking is the primary cause of emphysema, which makes it a preventable illness. There are also less common genetic causes of emphysema including alpha-1 antitrypsin deficiency.

Chronic obstructive pulmonary disease (COPD) - NHS

COPD is a type of obstructive lung disease in which chronic, incompletely reversible poor airflow (airflow limitation) and inability to breathe out fully (air trapping) exist. The poor airflow is the result of breakdown of lung tissue (known as emphysema), and small airways disease known as obstructive bronchiolitis. The relative contributions of these two factors vary between people.
