Engineering Economics

A key objective in engineering applications is the satisfaction of human needs, which will nearly always imply a cost. Economic analyses may be based on a number of cost classifications: First (or Initial) Cost : Cost to get activity started such as property improvement, transportation, installation, and initial expenditures.

MSc Finance and Economics

Finance and capital play a major role in every economy or business. Investment is often the key to the success of a construction business, and government policies and spending can have very real effects in terms of producing steady growth and minimising the impact of recessions.

equilibrium point of demand & supply, understanding average cost and marginal cost, finding differences between fixed cost & variable cost and many such theoretical concepts; finance, on the other hand, is the right extension of these concepts. Thus, it's often been seen that people who have made their mark in finance have often had an economics background.
