Today, 400 years after Galileo first pointed a telescope to the skies, astronomers use giant mirrors on remote mountaintops to survey the heavens.

EYES ON THE SKIES 400 YEARS OF TELESCOPIC DISCOVERY
Storyline. The invention of the telescope has been by far the most revolutionary development in the history of astronomy. For thousands of years, astronomers had to rely on their eyes in unraveling the mysteries of the Universe. Then, 400 years ago, something entirely new happened: Galileo turned a homemade arrangement of magnifying glasses to the skies.

Eyes on the Skies (Video 2008) - IMDb
The International Astronomical Union's book and movie celebrating the 400th anniversary of the telescope. THE INVENTION OF THE TELESCOPE has been by far the most revolutionary development in the history of astronomy. For thousands of years, astronomers had to rely on their eyes in unravelling the mysteries of the Universe. The telescope revealed an embarrassment of astronomical riches, and led to a dramatic increase of knowledge about the wider world we live in.
