Calls to understand 'what works' in education are being made the world over. This book helps researchers and readers of research understand, plan and investigate causation in education. It guides readers through statistical matters, and shows them how to investigate qualitative causal research in education.

All electric and electronic products designed and produced for export to the European Economic Area (EEA) must now conform to the new EMC Directive 89/336/EEC, which came into force in 1996. Under these regulations, all devices designated for free trade must satisfy certain minimum requirements regarding safety and electromagnetic compatibility. CE Marking for the EMC Directive is a pivotal guide to achieving certification. It examines the requirements imposed by the EMC Directive and the various routes, which must be taken to achieve full compliance. This comprehensive volume explains how companies can certify their own products, saving both time and money. It contains the complete text of the EMC Directive and answers frequently asked questions on the certification process. Practical

Multi-Domain Master Data Management delivers practical guidance and specific instruction to help guide planners and practitioners through the challenges of a multi-domain master data management (MDM) implementation. Authors Mark Allen and Dalton Cervo bring their expertise to you in the only reference you need to help your organization take master data management to the next level by incorporating it across multiple domains. Written in a business friendly style with sufficient program planning guidance, this book covers a comprehensive set of topics and advanced strategies centered on the key MDM disciplines of Data Governance, Data Stewardship, Data Quality Management, Metadata Management, and Data Integration. Provides a logical order toward planning, implementation, and ongoing management of multi-domain MDM from a program manager and data steward perspective. Provides detailed guidance, examples and illustrations for MDM practitioners to apply these insights to their strategies, plans, and processes. Covers advanced MDM strategy and instruction aimed at improving data quality management, lowering data maintenance costs, and reducing corporate risks by applying consistent enterprise-wide practices for the management and control of master data.

This book addresses information technologies recently applied in the field of construction safety. Combining case studies, literature reviews and interviews to study the issue, it presents cutting-edge applications of various information technologies (ITs) in construction in different parts of the world, together with a wealth of figures, tables and examples. Though primarily intended for researchers and experts in the field, the book will also benefit graduate students.

This book constitutes the fascinating work of Dr. Hans-Joachim Rudolph to portray the concept of Microvita in a physics framework that can be studied objectively. It offers a smooth integration of Microvita (units of consciousness) into a well-grounded scientific scenario, consistent with the equations of Newton, Maxwell, Einstein, and Schrodinger. It also provides a link between the worlds of perception and conception and implies that the distinct disciplines of physics, biology, psychology, and mathematics can be merged into one science of everything. So what has Dr. Rudolph done? To explain the mind-body problem, he has structured a universal grid, consisting of the cognitive and operative aspects of the supreme causal factor. Its lattice width is in the range of Planck length and can release  $2 \times 2$  matrices of primary matter as well as complex  $4 \times 4$  matrices, which contain the key qualities of elementary particles. Then, by means of a modified positive or negative creation operator, particles can be produced, which contain imaginary representations of the opposite qualities, thereby modeling the phenomenon of quantum entanglement - an approach that provides the basis of our universal interconnectedness. Let us now enter the arena of human propensities and self-realization, which is of prime concern to all of us: Dr. Rudolph postulates that neuronal assemblies are quantum objects, susceptible to a Quantum Zeno-like effect. Their electrical activities are transient and unstable, but can be stabilized by the production and annihilation of quasiparticles at defined frequencies ( $\omega$ ) and durations ( $t$ ), which is, in turn, controlled by sets of synchronized Microvita. In this context, three levels of Microvita are to be distinguished: biological, psychological, and spiritual. Energization of the chakras in meditation can stimulate Microvita to cause biological regeneration and disease curing as well as to

attain higher consciousness attributes. Then, ideating on and illuminating the mind with cosmic consciousness can attract spiritual Microvita to help rejuvenate the mind by dissolving its embedded psychic impressions, leading to self-realization. Thus it can be seen that Microvita have a distinctive role in guiding our life journey towards its cosmic abode. I greatly complement Dr. Rudolph for this book, which will hopefully invoke the interest of many independent minds to explore and discover the new science of Microvita.

Korean: A Comprehensive Grammar is a reference to Korean grammar, and presents a thorough overview of the language, concentrating on the real patterns of use in modern Korean. The book moves from the alphabet and pronunciation through morphology and word classes to a detailed analysis of sentence structures and semantic features such as aspect, tense, speech styles and negation. Updated and revised, this new edition includes lively descriptions of Korean grammar, taking into account the latest research in Korean linguistics. More lower-frequency grammar patterns have been added, and extra examples have been included throughout the text. The unrivalled depth and range of this updated edition of Korean: A Comprehensive Grammar makes it an essential reference source on the Korean language.
