How to Open a Post Processor for editing Your current post processor is located at the bottom right of your FeatureCAM screen To open the post double click your left mouse button on the post processor name. Click on the Edit Button to start editing the current post processor. Xbuild will now open the post processor reading for editing.

FeatureCAM Post Processor - CNC

FeatureCAM supports a comprehensive range of CNC applications including milling, turning and wire applications. The software caters to the programming needs of 3-5-axis mills, multi-tasking turning centers, Swiss-type lathes, wire EDMs and more. Standardise practices and promote repeatability. FeatureCam takes the manufacturing knowledge of the programmer to intelligently make decisions and produce results.
