Female Headed Households And
Homeownership

Abstract. The homeownership rate of female heads of household is substantially lower than the rate for married women. A number of factors could account for this observation including differences in income and its sources, wealth, demographic characteristics, and the relative price of homeownership.

Chile, Honduras And Nicaragua, the paper shows that although on average women have lower probability of being homeowners, women who head households (single, separated or divorced) have a greater probability of attaining homeownership. Thus household level analysis should control for the endogeneity of household headship in order to properly address the gender effect on housing tenure.

Female-Headed Households and Homeownership in Latin ...

The gender of the household head has often been treated as an exogenous determinant of homeownership. This paper argues that several determinants

or a female taking care of her siblings. Zimbabwe has the highest prevalence of female-headed households with 45% of its households headed by a female.

Female Headed Households In The Developing World And ...
In 2014-18, 13% of households were headed by females, up 1 percent from 2000 and the same as the national rate. This makes Arkansas 40th in the nation on this indicator, including the 50 states and Washington, D.C. The rate was higher for black or African American households at 29%, though that was a decline from 32% in 2000.
