Coolant leaking problem of the 1998 Ford Expedition 3 Head gaskets are leaking coolant onto the ground. A recall has been issued on vehicle's make and model; however, this vehicle was not included due to VIN.

~~Ford Expedition Coolant Leaking Problems~~
The '18's use orange coolant (Motorcraft part# VC-3DIL-B Orange Pre-Diluted Antifreeze/Coolant), but it looks pink when viewed through the expansion tank. Open the cap and look in the expansion tank (when engine is cool) and you'll see that it really is orange. For some reason the '19's now use the yellow coolant. Last edited: Jun 19, 2019

My 2015 Expedition has been to dealers several this for a coolant leak. Several hoses, water pump, and coolant transfer valve have been changed. I hope it fixed now but not to sure. We park in a garage with a drip pan so I will know soon. Feb 3, 2020 at 10:27 AM #16.

~~Coolant leak - Ford Expedition Forum~~
Engine coolant (which is also called antifreeze or anti-freeze) moves through the inside of your Expedition's engine and keeps it from overheating. Coolant can leak from the reservoir or from the hoses, in 2000 Expeditions with the 5.4 liter engine, coolant leaks are most likely to occur where the hoses connect to the engine. The video above shows you where the coolant reservoir, hoses and connections on your 2000 Expedition XLT are located and the steps needed to fix minor leaks.

2003 Ford Expedition, Fast leaking out of anti-freeze, not inside of the car. under the car below the driver side. front of truck is dry. Can it be the freeze plug in the rear of the engine? 1 Answer. The anti-freeze just pours out very quickly. Ran the truck for 1 hour and the engine never ran HOT!
