## ~~My daughter (10) is having anxiety 'meltdowns'~~

Anxiety is a normal, human feeling of fear or panic. When we face stressful situations, it can set off our brain's in-built alarm bell system, which tells us something isn't right and that we need to deal with it. Our brain wants the difficult situation to go away, so it makes us feel more alert, stops us thinking about other things, and even pumps more blood to our legs to help us run ...

## ~~Anxiety—YoungMinds~~

Anticipating a meltdown Many autistic people will show signs of distress before having a meltdown, which is sometimes referred to as the “rumble stage”. They may start to exhibit signs of anxiety such as pacing, seek reassurance through repetitive questioning or physical signs such as rocking or becoming very still.
