God's Equation: Einstein, Relativity, and the Expanding ...

In the general theory of relativity the Einstein field equations relate the geometry of spacetime to the distribution of matter within it. The equations were first published by Einstein in 1915 in the form of a tensor equation which related the local spacetime curvature with the local energy, momentum and stress within that spacetime. Analogously to the way that electromagnetic fields are related to the distribution of charges and currents via Maxwell's equations, the EFE relate the spacetime ge

Einstein field equations - Wikipedia

Einstein and the theory of relativity. In 1905 the three epochal papers by Albert Einstein were published in the journal Annalen der Physik. Planck was among the few who immediately recognized the significance of the special theory of relativity. Thanks to his influence, this theory was soon widely accepted in Germany.
