You may also want to set an alarm, just in case you lose track of time or fall asleep. This way, you'll be more able ...

~~Guided Imagery for Relaxation and Stress Management~~

Guided imagery is a focused practice that involves each of the five senses to ignite positive healing messages throughout the mind and body. The practice is often interchanged with visualization, self-hypnosis and guided meditation, but it has its own set of techniques. The benefits of guided imagery are vast - there is research that shows the practice can reduce fear and anxiety, lessen the frequency of headaches and has been proven to decrease psychological distress in cancer patients.
