Unlike images of sex, which were clandestine and screened only in private, images of death were made public from the onset of cinema. The father of the modern age, Thomas Edison, fed the appetite for this material with staged executions on film. Little over a century later the executions are real and the world is aghast at brutalities freely available online at the click of a button. Some of these films are created by lone individuals using shaky camera phones: Luka Magnotta, for instance, and the teenagers known as the Dnipropetrovsk maniacs. Others are shot on high definition equipment and professionally edited by organized groups, such as the militant extremists ISIS. KILLING FOR CULTURE explores these images of death and violence, and the human obsession with looking — and not looking —

at them. Beginning with the mythology of the so-called ‘ snuff ’ film and its evolution through popular culture, this book traces death and the artifice of death in the ‘ mondo ’ documentaries that emerged in the 1960s, and later the faux snuff pornography that found an audience through Necrobabes and similar websites. However, it is when videos depicting the murders of Daniel Pearl and Nick Berg surfaced in the 2000s that an era of genuine atrocity commenced, one that has irrevocably changed the way in which we function as a society.

An examination of our many modes of online identity and how we live on the continuum between the virtual and the real. Hello Avatar! Or, {ISay(0, "Hello, Avatar!"); is a tiny piece of user-friendly code that allows us to program our virtual selves. In Hello Avatar, B. Coleman examines a crucial aspect of our cultural shift from analog to digital: the continuum between online and off-, what she calls the “ x-reality ” that crosses between the virtual and the real. She looks at the emergence of a world that is neither virtual nor real but encompasses a multiplicity of network combinations. And she argues that it is the role of the avatar to help us express our new agency—our new power to customize our networked life. By avatar, Coleman means not just the animated figures that populate our screens but the gestalt of images, text, and multimedia that make up our online identities—in virtual worlds like Second Life and in the form of email, video chat, and other digital artifacts. Exploring such network activities as embodiment, extreme (virtual) violence, and the work in virtual reality labs, and offering sidebar interviews with designers and practitioners, she argues that what is new is real-time collaboration and copresence, the way we make connections using

networked media and the cultures we have created around this. The star of this drama of expanded horizons is the networked subject—all of us who represent aspects of ourselves and our work across the mediascape.

In the wake of the suicide of one of her patients, a young Satanist, psychologist Sarah Lynch, a cynic who had lost her own faith years before, attempts to conjure the devil himself in order to understand what the teenager had been thinking at the time of his death, only to discover that her experiment has succeeded all too well. Reprint.

From sexual abuse and fetishism to necrophilia and sadomasochism, this unique volume identifies fourteen classifications of unusual sexual pathologies. Emphasizing the physical and psychological aspects of sexuality itself, the book presents detailed comparisons of legal and medical definitions, historical aspects, current incidence, and geographical prevalence of these offenses. It also explores the potential causes, discussing etiological theories and reviewing psychopathology. Highlighting the cross-cultural nature of the forensic aspects of human sexuality, the book examines various case studies in the context of international legislation. It also covers minor aberrant behavior such as coprolalia and troilism.

Goldstein presents a lively analysis of Shakespeare, Milton, religious writers and recipe book authors from the perspective of communal eating.

A retelling of the folk tale about a little girl who finds a wolf in her grandmother's clothing.

The past is another country – this is your guidebook, from nationally bestselling author of *The Time Traveler's Guide to Medieval England*. Imagine you could see the smiles of the people mentioned in Samuel Pepys' s diary, hear the shouts of market traders, and touch their wares. How would you find your way around? Where would you stay? What would you wear? Where might you be suspected of witchcraft? Where would you be welcome? This is an up-close-and-personal look at Britain between the Restoration of King Charles II in 1660 and the end of the century. The last witch is sentenced to death just two years before Isaac Newton' s *Principia Mathematica*, the bedrock of modern science, is published. Religion still has a severe grip on society and yet some—including the king—flout every moral convention they can find. There are great fires in London and Edinburgh; the plague disappears; a global trading empire develops. Over these four dynamic decades, the last vestiges of medievalism are swept away and replaced by a tremendous cultural flowering. Why are half the people you meet under the age of twenty-one? What is considered rude? And why is dueling so popular? Mortimer delves into the nuances of daily life to paint a vibrant and detailed picture of society at the dawn of the modern world as only he can.
