 Divided into four parts—Historical Discussions; Characterizing Health, Disease, and Illness; Clinical Applications of Health and Disease; and Normalcy, Genetic Disease, and Enhancement: The Future of the Concepts of Health and Disease—the reader can see the evolutionary arc of medical concepts from the Greek physician Galen of Pergamum (ca. 150 ce) who proposed that "the best doctor is also a philosopher," to contemporary discussions of the genome and morality.

Health, Disease, and Illness: Concepts in Medicine ...  
 Divided into four parts—Historical Discussions; Characterizing Health, Disease, and Illness; Clinical Applications of Health and Disease; and Normalcy, Genetic Disease, and Enhancement: The Future of the Concepts of Health and Disease—the reader can see the evolutionary arc of medical concepts from the Greek physician Galen of Pergamum (ca. 150 ce) who proposed that "the best doctor is also a philosopher," to contemporary discussions of the genome and morality.

Health, Disease, and Illness: Concepts in Medicine ...  
 Concepts such as disease and health can be difficult to define precisely. Part of the reason for this is that they embody value judgments and are rooted in metaphor. The precise meaning of terms like health, healing and wholeness is likely to remain elusive, because the disconcerting openness of the outlook gained from experience alone resists the reduction of first-person judgments (including those of religion) to third-person explanations (including those of science).

Disease, illness, sickness, health, healing and wholeness ...  
 Illness is the abnormal biological afflictions or mental disorder that has a cause, symptoms and method of treatment. Illness is what a sick person feels which also include some characteristics patterns (symptoms) and other feelings associated with the illness. The doctor sees the disease while the sick person feels the illness.

 □ A disease is characterized by impairment in the normal functioning of an individual or the structure of his body part. □ In general, both disease and illness are used to refer to the same concept of ailment or sickness. □ It is the organ of a person that is afflicted by a disease. On the other hand, illness is something that a person has.

Difference Between Disease and Illness | Compare the ...  
 She concludes that "health, illness, disease, disability and wellness are therefore parts of the same process". Travis & Ryan (1981) devised a model for assessing a person’s health level, by depicting a health–illness continuum from high-level wellness to severe illness. At the midpoint of the continuum are risk factors that may determine a person's propensity to be healthy or ill, such as genetic, environmental, social and cultural factors that are a compilation of all the ...
