Pedigree Worksheet 3 Hemophilia the Royal Disease Answers ...

Haemophilia figured prominently in the history of European royalty in the 19th and 20th centuries. Britain's Queen Victoria, through two of her five daughters, Princess Alice and Princess Beatrice, passed the mutation to various royal houses across the continent, including the royal families of Spain, Germany and Russia. Victoria's son Prince Leopold, Duke of Albany, also suffered from the disease. For this reason, haemophilia B was once popularly called "the royal disease". Tests on the remains

Haemophilia in European royalty - Wikipedia

In essence, hemophilia is an inherited deficiency disease in which there is a deficiency in a certain protein called Factor VIII. This is generally present in children, and infants, but not in older individuals. The amount of Factor VIII that is present in an individual is measured using a blood test that measures levels of this protein.
