What are Inclusion and Exclusion criteria? These are the boundaries that decide exactly what information you want to find in your literature search and allow you to decide which studies should be included or excluded in your results. Establishing your inclusion criteria should help you to turn your topic into a viable question.

---

Establish your Inclusion & Exclusion Criteria - Doing ...

Inclusion and exclusion criteria set the boundaries for the systematic review. They are determined after setting the research question usually before the search is conducted, however scoping searches may need to be undertaken to determine appropriate criteria. Many different factors can be used as inclusion or exclusion criteria. Information about the inclusion and exclusion criteria is usually recorded as a paragraph or table within the methods section of the systematic review.
