The planning, design and construction of sustainable infrastructure is of vital importance in developed and developing countries and in rural and urban areas, as it supports and connects our communities. Arup understands this, which is why the firm has carried out work of this nature around the world for the last four decades.

Infrastructure Sustainability And Design [EBOOK]

Infrastructure Sustainability Infrastructure is the basic physical and organisational structures needed for the operation of a society. It is the roads that we drive on, the electricity lines that bring us power, and the airports we fly from. ISCA are concerned with all types of infrastructure, including but not limited to:
